Re: Arrow Gear Company
NPDES Permit No. ILG250001

Gentlemen:

The Agency has reviewed your letter, dated September 30, 1998, stating that you have installed a closed-looped system eliminating the discharge of non-contact cooling water, thus no longer requiring a NPDES permit for that discharge. Additionally, the Agency has determined that the stormwater discharge from the facility can be covered under the Agency's general permit for stormwater associated with industrial activities.

Because of this situation, and the fact that the general permit for the facility has expired, the Agency hereby terminates NPDES Permit No. ILG250001 and will cover the stormwater discharges with Permit No. ILR005775 effective immediately.

Please be advised that should you wish to discharge other waters besides stormwater to surface waters in the future, you must submit a complete application to this Agency a minimum of 180 days in advance of any discharge.

Should you have any questions or comments, please contact Richard E. Pinneo at the indicated address or telephone number.

Very truly yours,

A handwritten signature in cursive script, reading "Thomas G. McSwiggin".
